

## Expertly Guiding Homeowners Through The Insurance Claim Process

If your home's roof has been devastated by fire, wind, or hail, contact Titan Roofing immediately. Our caring team will ally with you to assess the situation promptly and offer our expert guidance about renovating your roof. We also take immediate intervening steps to mitigate further interior damage to your home.

When working with your insurance company and the adjuster, our experienced claims specialist will assist you and advocate on your behalf to see that your roof is restored fully and that you collect everything you are entitled to receive through your insurance company. With Titan Roofing in your corner, your complete satisfaction is our priority.

Follow these steps when filing an insurance claim:

1. Hire an expert roofing company that is certified to inspect and document the damage immediately following a severe weather event (such as wind, hail, or heavy rain).
2. Given the inspection findings, review your insurance policy with your roofing contractor to determine if filing an insurance claim makes sense.
3. Obtain an estimate from your roofing contractor. Do not rely on the insurance adjuster to accurately determine the repair or replacement cost of your roof.
4. File your insurance claim and notify your insurance company that you retained a roofing contractor to advocate on your behalf.
5. Prepare to meet with the insurance adjuster by having your roofing contractor present at the inspection performed by the insurance adjuster.
6. Assuming your insurance company approves a roof repair or replacement, promptly collaborate with your roofing contractor to schedule the work.
7. As your roofing contractor completes each stage of the roof repair or replacement project, communicate with your insurance company.
8. Ensure all required inspections pass to the satisfaction of local ordinances and the insurance company.
9. Collect all insurance funds disbursed from your insurance company and settle all amounts owed to your roofing contractor.
10. Secure and register any manufacturer or workmanship warranties associated with the new roofing materials installed on your home.
